DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 – 20 are drawn to a semiconductor device (or structure), classified in class 257, subclass 767.

II. Claims 21 – 27 are drawn to a method or process for making a semiconductor device or structure, classified in class 438, subclass 99.

2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as selectively forming the ILD layer everywhere except where at least a portion of the substrate needs to be exposed.

3. Because these inventions are distinct for the reasons given above and have

Art Unit: 2811

acquired a separate status in the art, as shown by their different classifications, the search required for Group I is not required for Group II, and separate examination would be required. For this reason, restriction for examination purposes, as indicated, is proper.

4. Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined, even though the requirement may be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
